

Mentors, who prepare you for

*VMware, cloud computing
and cyber security.*

Brand Overview:

www.GoVMlab.com

GoVMlabs is an enterprise-grade learning and edtech platform designed for professionals pursuing advanced skills in VMware, cloud computing, and cloud/cyber security. Positioned as more than just trainers, the GoVMlabs team acts as dedicated mentors, guiding learners through practical, industry-aligned coursework with real-world application and expert insights. Their curriculum emphasizes hands-on proficiency, professional readiness, and strategic understanding, enabling learners to confidently bridge the gap between theoretical knowledge and effective performance in dynamic tech environments.

Concept beyond the logo:

The logo for the brand is a combination of abstract and wordmark. First if we talk about the abstract mark, it's inspired from the layered architecture of all three technologies we're working on i.e. VMware, Cloud computing and Cyber security. The width of slabs of the layers are in the golden ratio of design which is 1.618. The primary typography of the logo is from the sans-serif font family. The primary color blue is inspired from the technological nature of the brand and the pale orange color is referring to the modernism and advancements.
